ESG (ENVIRONMENTAL, SOCIAL AND GOVERNANCE)

Sustainable and more responsible corporate practices are directly linked to business performance. Organizations with ESG best practices improve competitiveness and meet the growing expectations of their investors, shareholders, regulatory agencies and other stakeholders. For this reason, ESG issues have played an increasingly important role in the decision-making process of companies and their positioning in the market.

Considering the challenge of managing more sustainable organizations, legal advice on matters related to ESG certifies the adequacy of the legality of practices and assists in the decision-making processes of companies, always adapting them to the best international practices on this matter.

We assist our clients with the following solutions:

- Regulatory mapping, evaluation of internal controls and auditing;
- Strategic planning, diagnosis and assessment of ESG maturity;
- Elaboration of an ESG risk matrix;
- Third-party risk management (Due Diligence) that includes ESG parameters;
- Elaboration of corporate policies;
- Training and communication.
